Art Unit: 1648

The Art Unit location of your application in the PTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Examiner Jeffrey Stucker, Art Unit 1648.

This Office Action is in response to the amendment filed 3/3/06. Claims 14-19, 22, and 23 are pending, claims 15 and 16 are withdrawn from consideration. Claims 14, 17-19, 22, and 23 are under final rejection.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office Action.

The form 1449 mailed by Applicant 2/19/02 and received by the PTO 3/13/02 was apparently not previously considered. It has now been considered, initialed, and attached to the instant Office Action. The duplicate form submitted by Applicant 3/3/06 has been placed in the file.

Applicant has amended claims from the elected invention, gp130, to generic "envelope protein". The original restriction requirement stands.

The specification is still objected to because it does not comply with 37 C.F.R. 1.78. Specifically, not all of the listed application numbers are cited by series number. In addition, the "combined declaration and power of attorney" cites application 07/446,008 which is not listed on the first page of the specification. Correction is required.

The objection to claim 22 for improperly depending from canceled claims is withdrawn in view of Applicant's amendment. It is noted that claim 18 lacks antecedent basis for "[t]he method" of claim 17. In regards to claim 17, it states "any one of" claim 19.

Claims 22 and 23 are objected to under 37 CFR 1.75 as being a substantial duplicates of claims 17 and 18, respectively. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Applicant is advised that should claims 17 and 18 be found allowable, claims 22 and 23 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims

Art Unit: 1648

in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

The rejection of claims 14, 17-19, 22, and 23 under 35 U.S.C. 112, second paragraph, as being indefinite is withdrawn in view of Applicant's amendment.

The rejection of claims 14, 17-19, 22, and 23 under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement is withdrawn in view of Applicant's amendment.

The following is a new ground of rejection necessitated by Applicant's amendment:

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2),

Art Unit: 1648

and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 14, 17-19, 22, and 23 are rejected under 35 U.S.C. § 102(e) as being anticipated by Pedersen et al. (5,565,319).

The instant claims are drawn to a method for detecting FIV infection comprising contacting FIV envelope polypeptide in a mixture comprising the polypeptide that reacts with envelope protein-binding antibodies in a sample and assay device comprising an isolated FIV envelope polypeptide.

Pedersen et al., with a priority date of 8/26/87, teaches in column 4, lines 13-24, a composition comprising whole virus (a "mixture comprising the polypeptide") as well as portions of the virus. The envelope protein is one of the viral proteins specifically mentioned as being of particular interest. The patent teaches in column 6, lines 53-65, that detectable signal reagents are known and reported extensively in the literature. Suitable formats for assay devices are given in this paragraph but also in the examples given in columns 9-11 and in the claims. Thus, the instantly claimed invention is anticipated by Pedersen et al.

No claims are allowed.

Art Unit: 1648

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office Action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS FINAL ACTION IS SET TO EXPIRE THREE MONTHS FROM THE DATE OF THIS ACTION. IN THE EVENT A FIRST RESPONSE IS FILED WITHIN TWO MONTHS OF THE MAILING DATE OF THIS FINAL ACTION AND THE ADVISORY ACTION IS NOT MAILED UNTIL AFTER THE END OF THE THREE-MONTH SHORTENED STATUTORY PERIOD, THEN THE SHORTENED STATUTORY PERIOD WILL EXPIRE ON THE DATE THE ADVISORY ACTION IS MAILED, AND ANY EXTENSION FEE PURSUANT TO 37 C.F.R. § 1.136(a) WILL BE CALCULATED FROM THE MAILING DATE OF THE ADVISORY ACTION. IN NO EVENT WILL THE STATUTORY PERIOD FOR RESPONSE EXPIRE LATER THAN SIX MONTHS FROM THE DATE OF THIS FINAL ACTION.
